Reliable, hygienic & one - touch

A light touch on the temple is all it takes: Thermo delivers color-coded temperature feedback that is relevant to the user's age profile in order to help you easily understand the reading. So, when is a thermometer worth more than \$10-\$20? When it is as cool as the Withings' Thermo with HotSpot Sensor. Consider the advances included: 4000 measurements in 2 seconds, 16 infrared sensors, syncs with Wi-Fi or Bluetooth, temperature diary, easy to understand, CES Award Winner and the most sanitary way to take temperature to name a few. You can easily share the Thermo diary with your doctor at any time with one click. Traditional thermometers have always made you choose between comfort and accuracy, and don't help you monitor the health of the whole family. Thermo is a game changer. Currently waiting on FDA approval, sign up on Withings website to be notified when it's available. www.withings.com

A Crash Course in People Skills

This easy to read book is sure to help teens/adults of all abilities learn much needed people skills. It seems these days everyone is looking down at some sort of device. Poor eye contact and weak people skills plague many teens and most teenagers have a lot to learn before they can stand out at or even land a job. When a teen exhibits excellent people skills, it's like a ray of sunshine. The multiple award winning book, Smile & Succeed for Teens by Kirt Manecke, provides teens with a quick, easy, and fun way to improve their skills. It is even endorsed by Temple Grandin!
